

Filter Cartridges

OVERVIEW FILTER CARTRIDGES

Overview of the IAG nG filter cartridge range.

Our wide range of filter cartridges enables individual selection of the optimum filter material and appropriate deposition rate for any situation.

All **IAG nG filters** offer the highest quality at an attractive price: once again we guarantee the highest accuracy for your measurements for a constantly low cost.

All **IAG nG filters** have a filter surface of 70 cm² and can be installed in any **IAG nG filter** chamber.

Technical Data

PTFE Compound Ceramic Filters:

E-FP-CS Deposition:	99.00% Particles and Aerosols >0.01 µm
E-FP-DS Deposition:	93.00% Particles and Aerosols >0.01 µm
E-FP-BS Deposition:	99.99% Particles and Aerosols >0.01 µm

Stainless Steel Meshwork Filters:

E-FP-EM-F2 Deposition:	2 µm Particles
E-FP-EM-F5 Deposition:	5 µm Particles
E-FP-EM-F10 Deposition:	10 µm Particles

Stainless Steel Sinter Filters:

E-FP-ES-F3 Deposition:	96 % Partikel > 0.2 µm
E-FP-ES-F8 Deposition:	96 % Partikel > 0.04 µm
